Acquired by ATI in 2021

500,000-person ecosystem

EXECUTIVE BIOS

Matt Laudon, *Vice President*

Dr. Laudon is Vice President of the TechConnect division of ATI. He has spent his career supporting entrepreneurs, corporates, and federal agencies accelerate innovation into industry and society. Matt co-founded and led TechConnect, a 25-year technology prospecting company acquired by ATI in 2021.

Bart Romanowicz, *Vice President*

Bart is an expert in matching technology capabilities with industrial needs and has developed all process algorithms behind the TechConnect commercialization partnering programs, matching thousands of emerging technologies with corporate and investment commercialization interests from around the globe.

Nick Kacsandi, *Vice President, Innovation + Business Development*

Nick oversees global business development for TechConnect's commercial innovation service platforms and flagship events. Nick has designed and executed hundreds of collaborative programs, generating billions of dollars in new and value-added opportunities and partnerships for customers to date.

Laura Murphree, *Communications Director and Senior Project Manager*

Laura is the Communications Director and Senior Project Manager for TechConnect. In her role, she oversees all external marketing communications, public relations, and the execution of open innovation programs for the division.

Jennifer Rocha, *Vice President, Strategic Partnerships*

Jennifer develops strategic partnerships with F1000 companies, Department of Defense components, federal agencies, and universities for tech scouting and programming. Her 15+ years of experience in the innovation economy provides her unique situational awareness in research, policy, and technology assessment.

Sarah Wenning, *Vice President, Operations*

Sarah has 30+ years of science administration, meeting management and event planning experience - including directing operations for events ranging from 50 to 10,000 attendees. Sarah has managed technology development personnel from government agencies, national laboratories, universities and biotech start-ups. She has planned meetings and events for non-profits, government agencies, government contractors, associations and corporations.
